## **EXECUTIVE SUMMARY**

The Library and the College should operate in a rapidly changing and complex information environment. Developments of information and technology transform the education and communication landscape. New services and methods of access are required alongside the traditional elements of a Library.

Toward the implementation of K-12 by 2016, the trend is toward an independent, self-directed learning towards group and collaborative learning style. The Library plays a very important element of student experience and an enhanced scholarly community.

In line with the enhancement of research activity which serves as an avenue for new learnings and discovery, the delivery of print and digital information provides major challenges for LIBRARY SERVICES.

# FIVE – YEAR DEVELOPMENT PLAN (2016 – 2020)

## COLLEGE LIBRARY

### 1. Introduction

The combined former vision and mission of CCT to provide a high level of professional and personal existence toward the development of knowledge and skills to the economically under-privileged through subsidized education in order to find their place in a globally competitive environment bounded with character and knowledge is a very noble goal of the City government. The library, together with the faculty and its system, is always in partnership with the City to attain this goal.

In view of the plan of the CCT to be a university, a Five-Year Development Plan is a concrete starting point to be able to see the present status and link it toward its improvement as we are visualizing what we hope to be in the future.

The plan to expand its physical facilities toward DPWH and the proposal to erect a new Library building will give us the opportunity to abridge an enhanced library environment and facilities that will encourage and advance more learning, exploration, interaction and intellectual growth.

Through this planning process, we will be provided with a detailed consultation and review of the trends impacting our library through its development and realization of our objectives.

#### **Statement of purpose**

The purpose of this planning process is to attain the following:

- Connecting Students to Information
- Enhanced Library environments
- Digital Innovation
- Promoting Partnership and Collaboration
- Creating a Sustainable Organizational Capacity

### 2. The Situation:

The following are the deficiency of the Library as per Commission on Higher Education requirements and based on the needs of the students:

- As per evaluation of the CHED, the Library was able to comply approximately 10% of the requirements only, based on the required at-least 10,000. with 300 titles per program total of Printed and Non Printed materials.
- Based on 3,500 students, the ratio of the sitting capacity is 1 =109 students. The requirement of CHED is to be able to provide space for 350 students in any given time.
